

Tour Guide System PASS 650TG

The portable **Tour Guide System Pass 650TG**:

consists of an audio transmitter and a set of receivers, which are perfectly suitable for international conferences requiring multi-language support and scenic spots holding many different touring parties.

The **Pass 650TG** is our newest product. It provides all the essential features (long distance, very clear sound, multi-channels, interference free). It has a new design so that it has contact-charging points, and two-way inputs for sources. It can allow two guides to speak at the same time.

The Pass 650TG system has the following features:

- Limitless amount of wireless receivers for each transmitter.
- Automatic turn off to save battery time when there is no signal.
- Stationary transmitter available with MP3 playing function. Two way sound mixing function.
- Advanced microchips to ensure very little noises and compact size.
- Transmitter has mute function and two-way inputs for voice and MP3 file playing.
- Allow two guides to speak at the same time.
- High-Tech Rechargeable Lithium battery with large capacity. Very light weight.
- Over 200 meters range from the transmitter to receivers.
- 50-100 independent channels, up to 20 work simultaneously at the same location.
- Easy to use “drop in” multi-unit battery charger.
- Slim and compact design, easy to carry. Smallest size on the market.

Specifications:

Parameters	Value
Wave band	794-806 MHz, 823-832 MHz, 863-865 MHz, 902-915 MHz
Output Power	13 dBm
Frequency Response	20 - 16 kHz
Sensitivity	-115 dBm
deviation	+/-100k
Modulation	FM, PLL
Distance	200 m (Open ground/without interference)
S/N ratio	>60 db
Input	microphone/audio
Output	earphone/audio
No. of Channels	50-100 (adjustable)
Power supply	Rechargeable Lithium Battery
Dimension	72mm x 52mm x 16mm
